Cardiac Arrests

Typical symptoms are where an individual is unresponsive and not breathing. You must act immediately.

Call 999 and carry out CPR. Stay with the patient and ask for someone to fetch the nearest defibrillator.

To open the door of the defibrillator cabinet press 'C' button on keypad and turn handle. If locked, call 999 for the code.

Turn the defibrillator on, place pads on patient and follow the instructions.

Training is not necessary.
